AQUA BARRIER RDY TOP

Highly flexible waterproofing polymer-modified single-component mortar with a crack-bridging capacity

- Easy to apply by spatula, brush or roller
- Thixotropic creaminess for a perfect application even vertically
- Does not require using reinforcement mesh
- Top end performance and workability

**THE ULTIMATE
PROTECTION
AGAINST
INFILTRATIONS
OF WATER**

CERTIFICATIONS

AQUA BARRIER RDY TOP

- Flexible elastomeric cladding, with a crack-bridging capacity,
- Ideal for under-tile waterproofing of:
cement-based screeds, old floors, substrates made of concrete on: balconies, terraces and swimming pools.
- Compliant with standard EN 14891 class CM O1P.

Waterproofs backings before laying tiles, natural stone and mosaics **without** requiring reinforcement mesh.

INTENDED USE UNDER TILES:

Swimming pools and tubs

Spas and steam rooms

Balconies and terraces

Industrial showers, bathrooms and kitchens

Flat roofs and walkways

AQUA BARRIER RDY TOP

- Cladding for protecting concrete, reinforced concrete and cement-based materials against the penetration of water and CO₂.
- Compliant with standard EN 1504-2 principles PI (Protection against ingress), MC (Moisture Control) and IR (Increasing Resistivity).
- Ideal also for visible applications, UV resistant.

Protects concrete from the effects of de-icing salts, freeze-thaw attacks and carbon dioxide.

CONCRETE PROTECTION

INTENDED USE ON VIEW FOR CONCRETE PROTECTION:

- hydraulic works made of concrete
- irrigation canals
- tubs and tanks
- basins and eaves
- front panels and cornices
- earth retaining walls and foundations
