# EPD DECLARATIONS

## LATICRETE obtains EPD Environmental Product Declarations

Environmental transparency of construction products

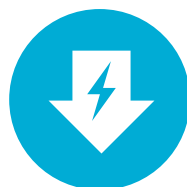

We are proud to strengthen LATICRETE®'s role as a trusted partner for sustainable construction, reaffirming our commitment to high-performance, transparent, and environmentally responsible solutions that support forward-looking designers, contractors, and clients.

## What are they and why are they important?

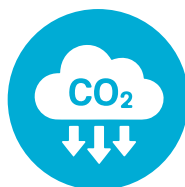

They are product environmental declarations verified by independent third parties, based on Life Cycle Assessment (LCA) studies and prepared in accordance with recognized international standards (ISO 14025, EN 15804). They provide transparent, objective, and comparable information about the environmental impacts of products throughout their entire life cycle, including:

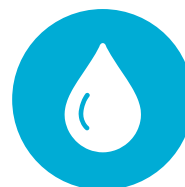

Raw material usage

Energy consumption

CO<sub>2</sub> emissions

Water consumption

Waste generation

# EPD ENVIRONMENTAL PRODUCT DECLARATIONS

EPDs enable the integration of products into projects with specific environmental criteria, supporting protocols such as LEED, BREEAM, and CAM. They offer **tangible value to designers, contractors, and clients** by providing reliable and transparent environmental data.

This milestone confirms LATICRETE's commitment to **continuous improvement and to reducing environmental impact**, without compromising performance and innovation.

## EPDs are available for the following LATICRETE products

Mortars and Screeds

Tile adhesives and cementitious surface protection products

Sealants
