

For the Builders of a Better World™

# NEW LATICRETE® PROFILES & TRIMS CATALOGUE

## Integrated finishing systems for the installation of tile and natural stone

LATICRETE® expands and completes its range of installation systems with the new **LATICRETE® Profiles & Trims Catalogue**, a strategic step that further strengthens the company's positioning as a **global partner for quality construction**.

The catalogue is the concrete result of the acquisition of a **majority stake in fuma-Bautec**, one of the leading German manufacturers of aluminum and stainless steel profiles, internationally recognized for its **high technical and production standards**.

This evolution enables LATICRETE® to offer **complete, coordinated and high-performance solutions**, capable of meeting the **technical, aesthetic and design requirements** of contemporary construction.

The New LATICRETE® Profiles & Trims Catalogue is now available for consultation.

## From the fuma-Bautec acquisition to a system-based offering

In January 2025, LATICRETE® acquired a majority stake in fuma-Bautec, a company specialized in the design and manufacture of high-quality profiles for ceramic and natural stone applications. Alongside LATICRETE's established expertise in tile and natural stone installation systems, fuma-Bautec now contributes its manufacturing know-how, based on:

- Advanced industrial processes
- Rigorous quality controls
- Carefully selected, durable materials

This synergy results in a structured, reliable offering, specifically designed for the professional market.

## LATICRETE Profiles – Technical Features

The New LATICRETE® Profiles & Trims Catalogue includes a complete range of solutions designed to ensure functionality, durability, and aesthetic excellence, including:

- Aluminum and stainless steel profiles
- High dimensional accuracy and extrusion quality
- Excellent mechanical strength and corrosion resistance
- Solutions for edge protection, transitions, joints, and finishing details
- Perfect compatibility with LATICRETE® installation systems

The profiles are suitable for residential, commercial, and industrial applications, for both indoor and outdoor environments, ensuring high performance even under demanding service conditions.

## Colour Coordination and Aesthetic Consistency

A distinctive feature of the range is the strong focus on colour uniformity and the overall consistency of the final result. LATICRETE® profile finishes are designed to:

- Harmonize with the LATICRETE range of grouts and sealants
- Simplify colour matching across continuous surfaces
- Enhance the project from an architectural perspective

This approach enables designers and installers to work with coordinated systems, reducing the risk of aesthetic inconsistencies and simplifying design choices.

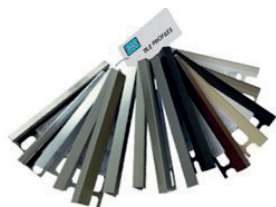

## Complete systems. One trusted partner.

With the introduction of profiles, LATICRETE® further strengthens its role as a global provider of installation systems, offering a complete portfolio that includes:

- Adhesives
- Waterproofing systems
- Screeds and substrates
- Grouts and sealants
- Profiles and finishing solutions

All supported by market-leading manufacturers, qualified technical assistance, and high quality standards.
