

LATASCREED 100

- High Strength
- Shock & impact resistant
- Water retaining & self curing
- Easy to use
- Fast & Economical

FLOOR UNDERLAYMENT CONCENTRATE

LATASCREED 100 powder is a factory prepared, blend of carefully selected raw materials, Portland cement and graded fillers. Designed for use with water and aggregates to produce high strength, water retaining, quick drying & self-curing screed with controlled shrinkage hydraulic binder for screeds

For more information, see the product data-sheet / please contact our technical dep.

USE:

For interior and exterior floor bonded and unbonded screeds. Formation of screeds onto which ceramic tiles can be laid after 24 hours and natural stone after 2 days. Patching and repairing floor

PACKAGING:

20 kg bag ; 72 bags per pallet

MIXING:

Mix LATASCREED 100 with 50% water by weight and make lump free slurry. Apply an even thickness of the slurry to the cleaned substrate using a brush or roller to ensure the primer is absorbed into the substrate. Each 20 kg bag of LATASCREED 100 will cover 20 Sq. Mtrs. approximately.
