

February 2020

Dear LATICRETE Customer,

LATICRETE is pleased to introduce the newest product to its line of polyaspartic coatings, SPARTACOTE™ Flex XPL Low Gloss, a high solids, low VOC resinous floor coating for both decorative and protective applications. Designed to be used as a top coat over all SPARTACOTE resinous coating systems, it allows for a quick return to service while providing an attractive, less reflective finish.

SPARTACOTE Flex XPL Low Gloss delivers optimal impact, abrasion, and chemical resistance characteristics. Suitable for high traffic applications, its UV stable nature and minimal installation odor are ideal for both interior and exterior applications.

Competitively priced, SPARTACOTE Flex XPL Low Gloss offers the following benefits:

- Attractive low gloss finish
- Quick cure time (4-5 hours foot traffic / 24 hours to vehicular traffic)
- Extended work time for easier workability
- Resistant to stains and spills so it is easy to clean
- Works with existing SPARTACOTE Flex XPL Part B for easy mixing and simplified ordering

We are very excited about the launch of this latest addition to the LATICRETE® Resinous Coatings product line and hope you are as well. If you have any questions, please contact me or your LATICRETE Technical Sales Representative. Thank you again for supporting LATICRETE!

Regards,
