# INDUSTRIAL FLOOR COATING

## Project Snapshot

### **Improve Productivity & Employee Morale with a Clean & Safe Facility utilizing resinous concrete floor coating systems**

Today's "Lean Manufacturing" concepts are the benchmark for world-class manufacturing optimization processes. A fundamental component that companies must consider includes the implementation of a well-designed floor plan and a clean, low maintenance environment. HP Spartacote partners with owners and facility managers to develop resinous concrete floor coating systems tailored to meet the needs of their unique situation. This collaboration results in a highly resilient and long-lasting floor coating that dramatically improves the overall environment with minimal installation downtime. Contact us today to discuss your upcoming project.
