Safety Data Sheet

Hazardous decomposition or combustion products : Not combustible. However, following evaporation of the water component of the material, the residual material can burn if ignited. On burning will emit toxic fumes.

6. ACCIDENTAL RELEASE MEASURES

Methods for Cleaning Up : Comply with all applicable health and environmental regulations. Spills may be collected with absorbent materials. Evacuate all unnecessary personnel. Place collected material in proper container. Complete personnel protective equipment must be used during cleanup. Large spills – shut off leak if safe to do so. Dike and contain spill. Pump to storage or salvage vessels. Use absorbent to pick up excess residue. Keep salvageable material and rinse water out of sewers and water courses. Small spills - Use absorbent to pick up residue and dispose properly.

Wash hands thoroughly after handling, especially before eating or smoking. Keep containers tightly closed and upright when not in use. Avoid conditions that result formation of inhalable particles such as spraying or abrading (sanding) painted surfaces. If such conditions cannot be avoided, use appropriate respiratory protection as directed under exposure controls/personal protection.

8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

Respiratory Protection : Control environmental concentrations below applicable exposure standards when using this material. When respiratory protection is determined to be necessary, use a NIOSH /MSHA (Canadian z94.4) Approved elastomeric sealing-surface facepiece respirator
